

Team 4 – Storyboard

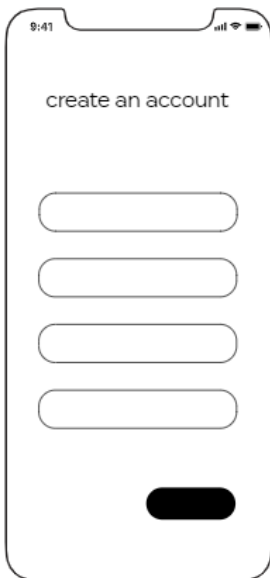

Front Page, when app is executed then this is the first page

Front Page

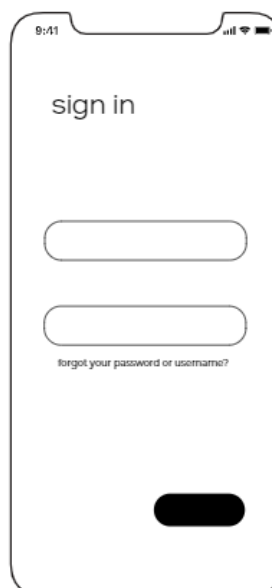

User must create an account in order to use the app. Returning users must sign in.

Create an Account

Sign In

A navigation bar is being used at the bottom of the screen. It appears once the user has logged into his account. It navigates between pages that display activities and categories, chats and messages, session in progress, profile and settings.

User must create an activity in order to use the interval function. Each activity has a set time to work and a set time to rest. Each activity is a part of a category.

Activity List Page

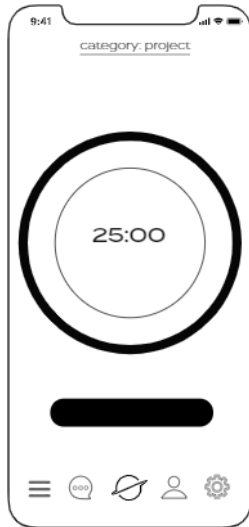

Category List Page

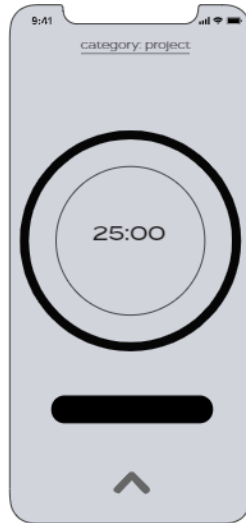

Once an activity has been created then users can start working towards their goal. Timer shows time left of work, and when work is done then resting time starts. When an activity is in progress then screen display becomes grey and user cannot interact with the app.

Session Display

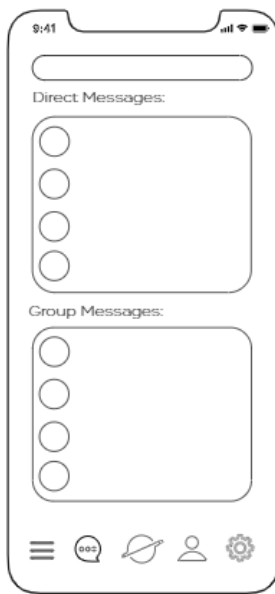

Session in progress

When a activity is not in progress, users can interact with each other using a message board. Messages can be sent and received via direct messages and/or group messages if user is a part of a project or a friend group.

List of chats

Chat example

Each user has a profile. The profile can be modified using images and text. User can view his own profile and the profile of friends. User also has access to general settings where general information and changes can be made.
